Note: The Fund is classified as non-diversified and may be more susceptible to risk than funds that invest more broadly. In addition REITs may decline from deteriorating economic conditions, changes in the value of the underlying property, and defaults by borrowers. Small- and mid-cap equities are considered riskier than large-cap equities due to greater potential volatility and less liquidity.

Parameters set by the Subadviser are not a fundamental policy of the Fund and are subject to change at any time.

Investment Strategy & Process

Management focuses on finding attractive investment opportunities in public real estate securities using proprietary bottom-up research and a blend of two valuation techniques.

Investment Universe

- Any listed North American security that derives a significant portion of its earnings from real estate
- Roughly 155 REITs—132 US-based, 23 Canadian-listed—and more than 20 real estate operating companies

Security Selection

- Employ a proprietary cross-sectional relative cash-flow multiple regression analysis to calculate expected 12-month total return
- Compare current stock price with estimated net asset value (NAV) using proprietary capitalization rate information
- Rank firms on management ability matrix to calculate min and max expected premium or discount to NAV
- Calculate estimated warranted share price based on results of management-adjusted NAV and the regression model

Portfolio Construction

- Understand that disciplined portfolio construction based on valuation aids in managing risk
- Believe small- and mid-cap REITs are less efficiently priced than large-caps and provide greater opportunities to add value
- Sector neutral for the six major property types in the benchmark (roughly 83% of index)
- Individual position size: max equals 500 basis points above benchmark weight; min is 150 basis points above index for non-large caps

***Based on a rolling 12-month average as of 10/31/2014.

P/FFO is defined as Price/Funds From Operations, which is a measure of cash generated by a real estate investment trust (REIT).

Objective: The Fund seeks total return through a combination of growth and income.

3 Yr. Portfolio Return Statistics

| | Class N |
|--------------------|---------|
| R-Squared | 98.35 |
| Beta | 0.99 |
| Alpha | -1.46 |
| Standard Deviation | 12.61 |
| Sharpe Ratio | 1.14 |

R-Squared is the percentage of a fund's movement that can be explained by movements in its benchmark index. **Beta** is a measure of risk which shows a fund's volatility relative to its benchmark index. **Alpha** measures the difference between a fund's actual returns and its expected performance, given its level of risk. **Standard Deviation** is a statistical measure of the range of a fund's performance. The **Sharpe Ratio** uses excess return and standard deviation to determine reward per unit of risk. Source: Morningstar, Inc.

¹ The **FTSE/NAREIT All Equity REIT Total Return Index** is a market capitalization weighted total return index of all U.S. REITs, excluding Timber REITs, that exceed minimum liquidity criteria concerning, market cap, shares outstanding, trading volume and per share market price.

² The **MSCI US REIT Index** is comprised of equity REITs that are included in the MSCI US Investable Market 2500 Index, with the exception of specialty equity REITs that do not generate a majority of their revenue and income from real estate rental and leasing operations. The index represents approximately 85% of the US REIT universe, and is an end of day, gross return index. Indices are adjusted for the reinvestment of capital gains and income dividends. Individuals cannot invest in an index.

OVERALL MORNINGSTAR RATING

Morningstar® Rankings

Based on Total Return

| Class N | 1 Yr. | 3 Yr. | 5 Yr. | 10 Yr. |
|-----------------|-------|-------|-------|--------|
| Percentile Rank | 89 | 77 | 58 | 74 |
| # of Funds | 274 | 236 | 192 | 151 |

As of 12/31/14. The N Class was rated 2 stars for the 3-year period, 3 stars for the 5-year period, and 3 stars for the 10-year period against 236, 192, and 151 Real Estate funds respectively.

For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating is derived from a weighted-average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. © Morningstar, Inc.

The highest or most favorable Morningstar percentile rank is 1 and the lowest percentile rank is 100. The top-performing fund in a category will always receive a rank of 1. Various rating agencies categorize funds differently. Past performance is no guarantee of future results.
