Highlights

- Seek equity-like returns with reduced volatility
- Dedicated long-short team that builds on firm's core competency in Absolute Value investing
- Layered risk management process

Subadviser

River Road Asset Management (Louisville, KY)

Founded in 2005, River Road seeks financially strong, well-managed companies selling at a meaningful discount to "Absolute Value" to achieve superior long-term, risk-adjusted returns.

Portfolio Managers

Matthew W. Moran, CFA

Portfolio Manager

Mr. Moran has 13 years of investment experience. He graduated summa cum laude with a BS in Finance from Bradley University and earned his MBA from The University of Chicago Booth School of Business.

Daniel Johnson, CPA, CFA

Portfolio Manager

Mr. Johnson has seven years of investment management experience. He received his BS in accounting and a masters in accountancy from the University of Kentucky.

Investment Strategy & Process

The Fund seeks to provide equity-like returns with reduced volatility and emphasis on capital preservation by taking long and short equity positions using a value-driven, bottom-up approach.

Long Portfolio

- Market Capitalization—minimum \$750 million
- Valuation—target a minimum 25% discount to proprietary estimate of Absolute Value
- Seek predictable, sustainable and understandable business models that generate significant free-cash flow
- Shareholder-friendly management based on insider ownership, stock buybacks, dividend policy, and value-enhancing transactions

Short Portfolio

- Market Capitalization—minimum \$500 million
- Valuation—target a minimum 20% premium to proprietary estimate of Absolute Value
- Seek firms with challenged business models, unsustainable capital structures and misaligned management incentives
- Avoid stocks with strong positive momentum

Layered Risk Management

- Active management of net long market exposure (from 10% to 90%); 50% to 70% in normal market conditions
- Bottom-up security risk evaluation on long portfolio
- Risk budget and cover discipline for individual short positions
- Control total unrealized losses in portfolio by reducing losing positions
- Drawdown Plan override that systematically reduces net market exposure during adverse market environments

Market Cap Breakdown

	Long	Short
Small Cap	8.7%	-14.9%
Mid Cap	33.7%	-14.2%
Large Cap	34.1%	-3.0%

3 Yr. Portfolio Return Statistics

	Class I
R-Squared	66.54
Beta	0.43
Alpha	1.00
Standard Deviation	6.84
Sharpe Ratio	1.17

R-Squared is the percentage of a fund's movement that can be explained by movements in its benchmark index.

Beta is a measure of risk which shows a fund's volatility relative to its benchmark index. Alpha measures the difference between a fund's actual returns and its expected performance, given its level of risk. Standard Deviation is a statistical measure of the range of a fund's performance. Volatility is calculated as the annualized standard deviation of daily change in price. The Sharpe Ratio uses excess return and standard deviation to determine reward per unit of risk. The performance data quoted represents past performance. Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares, upon redemption, may be worth more or less than their original cost. Some of the returns quoted reflect fee waivers or expense reimbursements. Returns for certain periods would have been lower without the waivers/reimbursements. Current performance may be lower or higher than the performance data quoted. For performance data current to the most recent month-end, please visit our website at www.astonfunds.com.

- * The **Russell 3000 Index** is capitalization-weighted index of the 3,000 largest U.S. companies, representing approximately 98% of the investable U.S. equity market.
- **The Morningstar Long-Short Equity Category figures allow for a direct comparison of a fund's performance within its Morningstar Category.

Morningstar Rating™

Based on Risk-Adjusted Returns

OVERALL MORNINGSTAR RATING

Morningstar® Rankings

Based on Total Return

Class N	1 Yr.	3 Yr
Percentile Rank	73	36
# of Funds	252	146

As of 6/30/14. The I Class was rated 4 stars for the 3-year period against 146 US-domiciled Long-Short Equity funds.

For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating is derived from a weighted-average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. © Morningstar, Inc.

The highest or most favorable Morningstar percentile rank is 1 and the lowest percentile rank is 100. The top-performing fund in a category will always receive a rank of 1. Various rating agencies categorize funds differently. Past performance is no guarantee of future results.
