

ASTON/Harrison Street Real Estate Fund (N: ARFCX) (I: AARIX)

Fund Quarterly Commentary

2nd Quarter 2013

Positive momentum for U.S. equities from the first quarter of 2013 continued into late May until Federal Reserve Chairman Ben Bernanke's monetary policy comments triggered a month long swoon. Despite the resulting dramatic, nearly 1% upward shift in the yield on the 10-year US Treasury bond that fueled the sell-off, most equities still managed to squeeze out gains for the quarter as the broad market S&P 500 Index gained 2.9%.

In contrast, U.S. equity real estate investment trusts (REITs) slipped during the quarter, with the Fund's FTSE/NAREIT All Equity REIT Total Return Index benchmark posting a negative 2.1% total return. Prior to Chairman Bernanke's comments on May 21, REITs had actually advanced more than 10% on a total return basis, and was just shy of a 20% total return year-to-date for 2013. Typical of previous reactions to rising interest rates, REITs retreated abruptly as the 10-year Treasury yield spiked. The benchmark declined 16% from May 21 to June 20, before recouping a portion of the downdraft during the waning days of June.

The Fund lagged its benchmark slightly during the quarter. Positive contributions from positions in large cap apartment owner AvalonBay Communities and NYC centric office landlord SL Green, among others, were overwhelmed by notable performance drags that included document storage operator Iron Mountain and data center owner Digital Realty Trust.

REITs and Rising Interest Rates

It is not unusual for REITs to retreat early in a rising rate environment. Deemed as interest-rate sensitive by broad equity investors, higher interest rates are expected to translate into higher capitalization rates and lower net asset values for real estate portfolios. Given the capital intensive nature of their business models, rising rates are also thought to increase REITs weighted average cost of capital as both their cost of equity and debt rise. Although accurate in the short-to-intermediate term, the eventual impact of rising rates on REIT valuations has typically been fairly benign, particularly when rising rates are corroborated by an improving economy (increasing employment, rising consumption, and growing demand for space).

The late second quarter pullback in REIT prices left the industry trading at an average 5% discount to net asset value by our calculation, well within the typical 10% discount to 10% premium range where REITs have traded nearly 90% of the time during the "modern REIT era" (1991 – present). We continue to see REITs increase their dividends by a substantial margin industry wide, which we think affords some measure of protection against the effect of rising interest rates.

Replication costs of commercial real estate continue to rise in thwarting new real estate supply and construction, particularly as rents are not rising as fast as construction costs. New supply of commercial real estate, except perhaps for apartments, remains near 20-year lows as a percentage of existing inventories—a favorable construct for well-capitalized existing landlords. Most REITs write their leases with inflation-linked or fixed annual bumps providing some cushion against rising interest rates and inflation. For that last reason especially, US REITs as a sector have in the past typically rebounded three to six months after sharp pullbacks triggered by interest rate spikes.

Harrison Street Securities
Chicago, IL

As of June 30, 2013, AvalonBay Communities comprised 4.91% of the portfolio's assets, SL Green – 4.75%, Iron Mountain – 2.44%, and Digital RealtyTrust – 5.39%.

Note: The Fund is classified as non-diversified and may be more susceptible to risk than funds that invest more broadly. In addition, REITs may decline from deteriorating economic conditions, changes in the value of the underlying property, and defaults by borrowers. Small- and mid-cap equities are considered riskier than large-cap equities due to greater potential volatility and less liquidity.

Before investing, consider the Fund's investment objectives, risks, charges, and expenses. Contact 800 992-8151 for a prospectus or summary prospectus containing this and other information. Please, read it carefully. Aston Funds are distributed by Foreside Funds Distributors LLC.

The performance data quoted represents past performance. Past performance is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares upon redemption may be worth more or less than their original cost. Certain expenses were subsidized. If these subsidies were not in effect, the returns would have been lower. The adviser is contractually obligated to waive management fees and/or reimburse expenses through February 28, 2014. Current performance may be lower or higher than the performance data quoted.

For periods less than one-year, total returns are reported; for periods more than one-year, average annual total returns are reported.

The MSCI US REIT Index is comprised of equity REITs that are included in the MSCI US Investable Market 2500 Index, with the exception of specialty equity REITs that do not generate a majority of their revenue and income from real estate rental and leasing operations. The index represents approximately 85% of the US REIT universe, and is an end of day, gross return index. Indices are adjusted for the reinvestment of capital gains and income dividends. Individuals cannot invest in an index.

The Morningstar Real Estate Category figures allow for a direct comparison of a fund's performance within its Morningstar Category.

Morningstar Rating™ (based on risk-adjusted returns) and Morningstar Rankings™ (based on total returns)

Real Estate Category as of 6/30/2013

	Overall	1 yr	3 yr	5 yr	10 yr
	Rating	Rank	Rating	Rank	Rating
Fund Class N Shares (ARFCX)	★★★★	12	★★★★★	7	★★★★
Fund Class I Shares (AARIX)	★★★★	11	★★★★★	7	N/A
Total # funds in category	230	263	230	206	131

For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating is derived from a weighted-average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. © Morningstar, Inc.

The highest or most favorable Morningstar percentile rank is 1 and the lowest percentile rank is 100. The top-performing fund in a category will always receive a rank of 1. Various rating agencies categorize funds differently. Past performance is no guarantee of future results.

Fund Overview

Investment Strategy

The **ASTON/Harrison Street Real Estate Fund** focuses on finding attractive investment opportunities in public real estate securities using proprietary bottom-up research and a blend of two valuation techniques.

Objective

The Fund seeks total return through a combination of growth and income.

Risk Considerations

The Fund is classified as non-diversified and may be more susceptible to risk than funds that invest more broadly. In addition REITs may decline from deteriorating economic conditions, changes in the value of the underlying property, and defaults by borrowers. Small- and mid-cap equities are considered riskier than large-cap equities due to greater potential volatility and less liquidity.

Highlights

- Dedicated REIT securities investment management firm
- High-conviction, sector neutral portfolio construction
- Emphasis on small- and mid-sized REITs

Subadviser

Harrison Street Securities, LLC (Chicago, IL)

Blends cash available for distribution evaluations with net asset value analysis to determine the warranted value of real estate securities.

Portfolio Managers

Reagan Pratt

Principal, Portfolio Manager

Mr. Pratt has 19 years of investment experience. He holds a Bachelor's degree in Economics and Geography from the University of Guelph (Ontario, Canada) and a Master of Science Business Administration (Urban Land Economics) from the University of British Columbia (Canada).

James Kammert, CFA

Principal, Portfolio Manager

Mr. Kammert has 18 years of investment experience. He holds a BA in Economics and Business from Lafayette College and earned an MBA from the University of Chicago.

Investment Strategy & Process

Management focuses on finding attractive investment opportunities in public real estate securities using proprietary bottom-up research and a blend of two valuation techniques.

Investment Universe

- Any listed North American security that derives a significant portion of its earnings from real estate
- Roughly 155 REITs—132 US-based, 23 Canadian-listed—and more than 20 real estate operating companies

Security Selection

- Employ a proprietary cross-sectional relative cash-flow multiple regression analysis to calculate expected 12-month total return
- Compare current stock price with estimated net asset value (NAV) using proprietary capitalization rate information
- Rank firms on management ability matrix to calculate min and max expected premium or discount to NAV
- Calculate estimated warranted share price based on results of management-adjusted NAV and the regression model

Portfolio Construction

- Understand that disciplined portfolio construction based on valuation aids in managing risk
- Believe small- and mid-cap REITs are less efficiently priced than large-caps and provide greater opportunities to add value
- Sector neutral for the six major property types in the benchmark (roughly 83% of index)
- Individual position size: max equals 500 basis points above benchmark weight; min is 150 basis points above index for non-large caps
